(57) Abstract :

The present invention provides web-based solution for streamlined billing and inventory management in SMEs. It features secure OTP-based login, dynamic notifications, and real-time dashboards for actionable insights. The system automates repetitive tasks, such as invoice generation and inventory tracking, while providing comprehensive data visualization. Its scalable, modular architecture allows customization and integration with external systems like payment gateways. It offers an affordable, streamlined solution to enhance operational efficiency and data accuracy, empowering SMEs to focus on growth and innovation. Figure 1
